Hist: MCX COPPER 2m/1d

**Mcx copper for month of august opened strong bullish and remain buy and accumulate above 400 rupee levels. Now heading lower to test support of 4000 rupee and then expect uptrend will resume for my upside targets of 424 and then 438 rupees.**

Hist: MCX COPPER Six Months/1m

For next week, mcx copper future price trend is bullish and remain buy on dips above 400 support zone. Above 424 and 438 are my given bullish swing target and this week we already saw high of 414 rupee. On downside mcx copper future support zones for next week are 400 and then 395.

From investment point of view, mcx copper future in 2017 hit support of 362 and now given reversal above but long term chart indicators are now bullish and suggesting upside for copper future and investment target is at 430. This week we saw high near 414 rupees.

In last 7 months, mcx copper future were down in 5 months while closed with gain in 2 months which now suggesting long term bottom formation and recovery rally.
